GNCORE / PRACTICAL SKILL COMPARISON

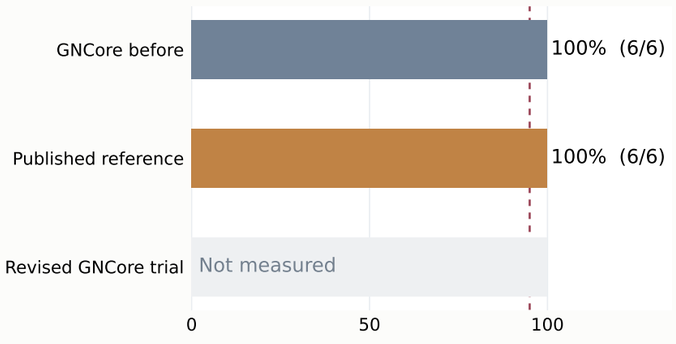
What passed, and what still needs work

Antigravity IDE / Gemini 3.8 Flash High | Development tasks | 30 developer categories

References: 14 pinned repositories, including Anthropic, Microsoft, Google, Hugging Face, Vercel and domain specialists.

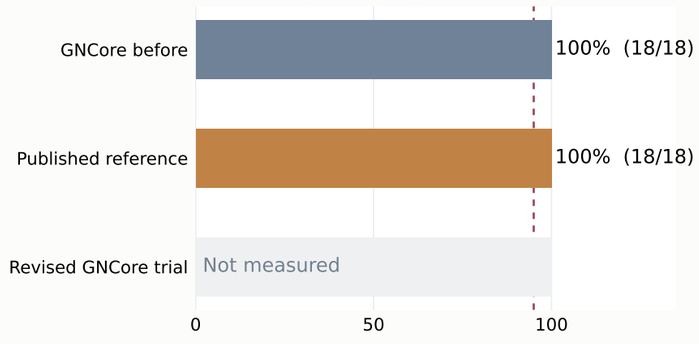
Defects correctly identified

Six seeded issues; manual review



Code repair: frozen tests

Additional exploratory regressions are separate



Numerical correctness

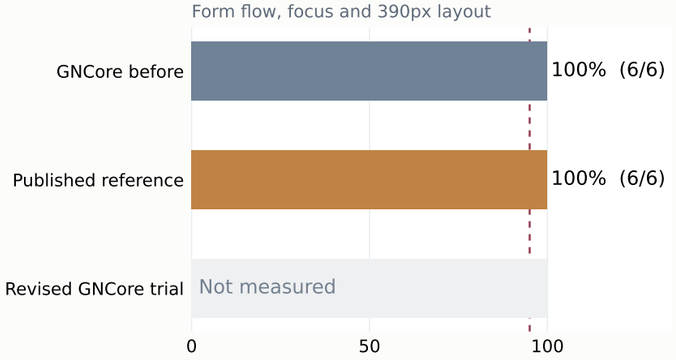
Loss, gradients, stability and validation

Tests that catch bugs

Correct implementation plus six mutants

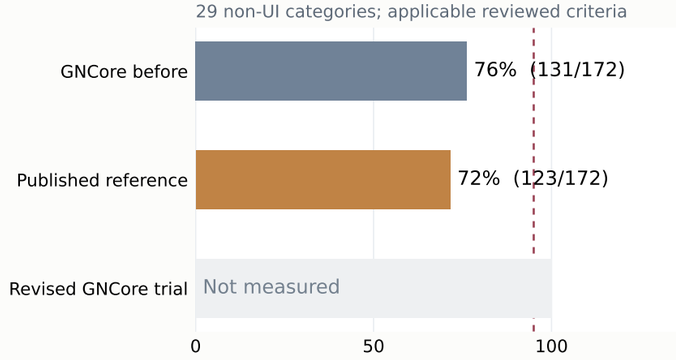
Web interface behavior

Form flow, focus and 390px layout



Other task checks

29 non-UI categories; applicable reviewed criteria



All categories: task checks passed

	Before	Reference	Revised trial
AI Engineering	67% 4/6	67% 4/6	N/A
Automation	83% 5/6	83% 5/6	N/A

Web Frontend	100% 6/6	100% 6/6	N/A

Read the percentages as passed checks, not a universal efficiency or security rating. 95% dashed line = goal only.

Pilot: one task per category per split and condition; no repeated trials or significance claim. References vary by category. Gray = not measured.

Manual review is unblinded. Models/IDE context can affect results. Raw answers, criteria, source revisions and logs accompany this report. 29 October 2026.
